Sludgeclean

Description

Sludgeclean is a high potency, bacterial concentrate for use in controlling solid wastes that have accumulated in lakes, ponds and aquaculture environments

Sludgeclean is 100% natural, non toxic and biodegradable

Advantages

Contains no Chemicals
Dissolves organic sludge
Reduces disease causing organisms
Promotes faster fish growth
Useful to unblock sand filters, gravel filters, sponge filters, vortex filters, etc.
Active under 12˚C
Breaks down dead algae
Harmless to pipes, humans, birds, fish and plant life
24 month shelf life

Application

Fish ponds
Fountains
Water tanks
Golf course ponds
Fish hatcheries
Indoor Aquariums

Dosing

Sludgeclean can be continuously dosed, either by batch treatment or dosing system
Sludgeclean can be added directly to the water without dilution
Multiple dosing may be done depending on the severity of the build-up

Dilutions

1 litre of Sludgeclean will treat 30 000 litres of water
